Characteristics on velib
station

	station_id	name	latitude	longitude	banking	bonus	bike_stands	postcode
0	4020	Place Edmond Michelet	48.860135	2.350064	1	0	23	75004
1	4021	Centre Georges Pompidou	48.861419	2.352581	1	0	26	75004
2	32303	Gaston Roussel - Commune de Paris	48.894320	2.432552	1	0	30	93230
3	32302	Chemin Vert - Fraternité	48.877141	2.446157	0	0	20	93230
4	32301	Mairie de Romainville	48.885109	2.435679	1	0	17	93230

Research Question

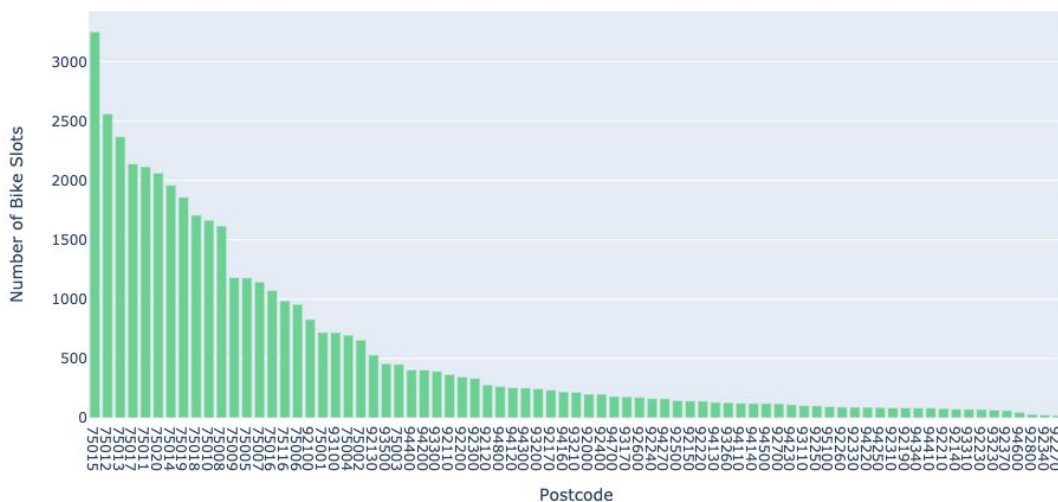

1. How many Velib bikes can we find in Paris and how are they distributed throughout the city?
2. How did the bike usage change during lockdown?
3. Which stations gained vs. lost bikes between 8-10am on the first day of lockdown? (compare to same day pre-lockdown)
4. How did the bike usage change over the entire period per arrondissement?

Research Question

1. **How many Velib bikes can we find in Paris and how are they distributed throughout the city?**
2. How did the bike usage change during lockdown?
3. Which stations gained vs. lost bikes between 8-10am on the first day of lockdown? (compare to same day pre-lockdown)
4. How did the bike usage change over the entire period per arrondissement?

Q1

Number of bike slots per arrondissement

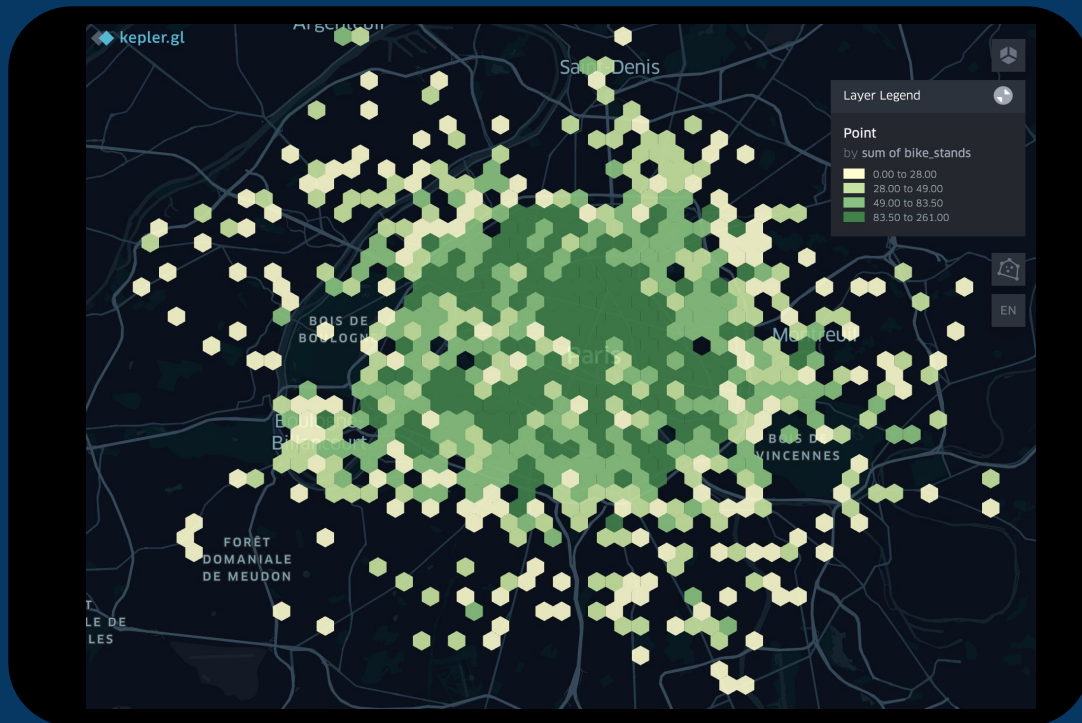

Observation:

Total nb. of Stations: **1399**
Nb. of Stations (Paris): **977**
Highest nb. Of bike slots per arrondissement: **3253 slots (15eme)**

Q1

Observation:

Right bank: highest density =>
2,9,8,11,4,1

Left bank: highest density => 15,5,6

Research Question

1. How many Velib bikes can we find in Paris and how are they distributed throughout the city?
2. **How did the bike usage change during lockdown?**
3. Which stations gained vs. lost bikes between 8-10am on the first day of lockdown? (compare to same day pre-lockdown)
4. How did the bike usage change over the entire period per arrondissement?

Bike usage on Wednesday

The relative usage was taken for the y-axis as we don't have the total number of bikes available!

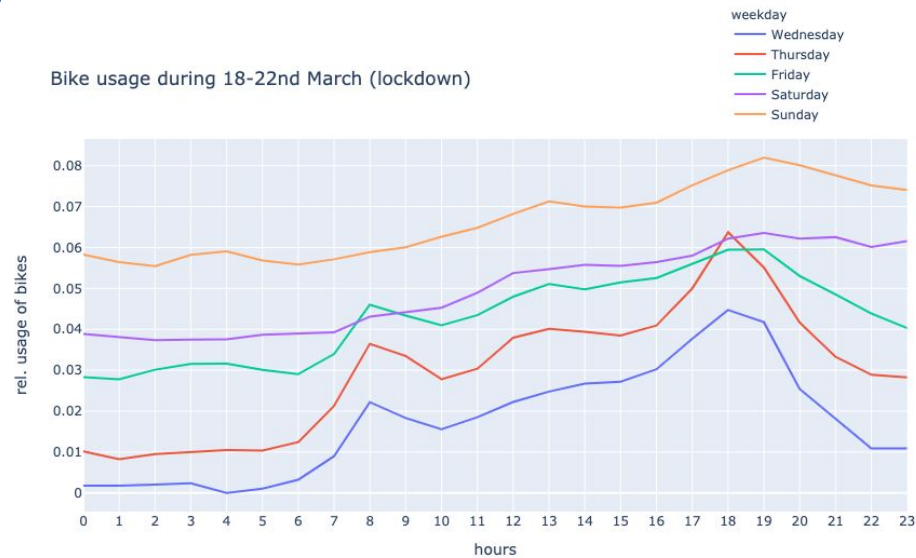

Observation:

As expected we can see less activity on Wednesday (lockdown) especially during the rush hours.

Bike usage during 11-16th March (prelockdown)

Bike usage during 18-22nd March (lockdown)

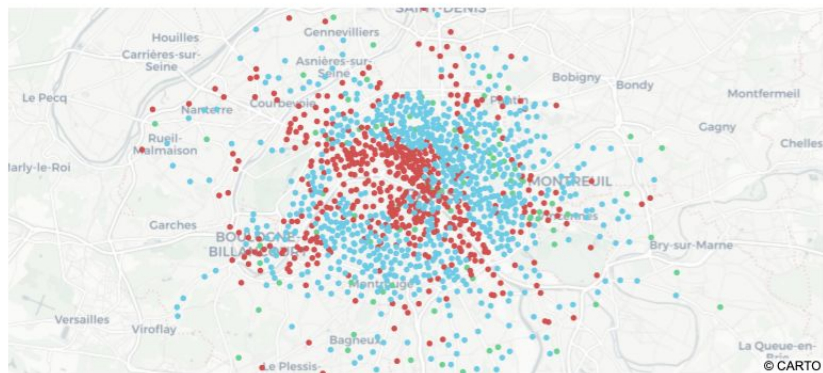

Research Question

1. How many Velib bikes can we find in Paris and how are they distributed throughout the city?
2. How did the bike usage change during lockdown?
3. **Which stations gained vs. lost bikes between 8-10am on the first day of lockdown? (compare to same day pre-lockdown)**
4. How did the bike usage change over the entire period per arrondissement?

Departed vs. Parked bikes per station (prelockdown 8-10am)

signal
 ● equal
 ● departure
 ● destination

Departed vs. Parked bikes per station (lockdown 8-10am)

signal
 ● equal
 ● departure
 ● destination

Timelapse of station activity **11/03/2020**
(Wednesday before lockdown)

Dot(red, small) = not a lot of bikes available

Dot(big, blue) = a lot of bikes available

Q3

Timelapse of station activity **11/03/2020**
(Wednesday before lockdown)

Dot(red, small) = not a
lot of bikes available

Dot(big, blue) = a lot of
bikes available

Timelapse of station activity **18/03/2020**
(Wednesday first day of lockdown)

Dot(red, small) = not a lot of bikes available

Dot(big, blue) = a lot of bikes available

Timelapse of station activity **18/03/2020**
(Wednesday first day of lockdown)

Dot(red, small) = not a
lot of bikes available

Dot(big, blue) = a lot of
bikes available

Research Question

1. How many Velib bikes can we find in Paris and how are they distributed throughout the city?
2. How did the bike usage change during lockdown?
3. Which stations gained vs. lost bikes between 8-10am on the first day of lockdown? (compare to same day pre-lockdown)
4. **How did the bike usage change over the entire period per arrondissement?**

Bike usage per day

Only arrondissement in Paris are visualized!

Observation:

Not optimal to tell but we can see a flattening out of the lines during the lockdown period (highlighted in yellow)

Bike usage per day

Observation:

We compare the business center (8) to the outskirts around (20)

Weekend

8eme:

PL => people move out during the weekend

L => less usage compared but increase weekend vs week

20eme:

PL => people used less during the weekend

L => usage is declining, people chill or respect 1km rule

Conclusion
